

Thank you for your interest in being an Academic Host for 3DAfrica HackforGood 2019.

Some benefits of this partnership include:

1. An opportunity to further academic research & development: Participants, including those from your university, will continue to be mentored post HackforGood and as appropriate will be introduced to private sector and industry players to match mentors, funding etc. This will be augmented by R & D efforts especially those grounded in engaging with regional innovation ecosystems.
2. Talent Identification and Hiring: Working in partnership with your university, our goal is to create the knowledge foundation for the next generation of innovators and provide a flow of newly minted talent for industry. Together, we will position participants as qualified workbench of resources and talent in the digital economy.
3. Long-Term Development of New Technology: Your students will be part of teams on the forefront of leading new technologies being developed and solutions to broad-based customer needs for new product lines or new businesses.
4. Opportunity to Engage with the Start-Up Pipeline: Your institution will have an opportunity to be the first to liaise with, identify and connect to start-ups innovating the next products for the African market raising the profile and positive publicity of your institution in the region.

We are excited to share more details about this opportunity with you. To learn more, please email: 3dafrica@youthfortechology.org and one of our staff members will get back to you to request more information or to schedule a follow up conversation.

*****At this time, 3DAfrica HackforGood is being held in partnership with universities based in Nigeria only*****.
